

# What power supply is used in Tanzania base stations

## Overview

---

What is the power distribution system in Tanzania?

The generation, transmission, and distribution of power in Tanzania, is channeled through TANESCO, which is fully owned by the government and is responsible for 98% of the electricity produced in the country. As of June 2022, the power distribution network length was 160,811km, of which 160,367 km was for TANESCO and 444 km for Mwenga.

Who owns the power plants in Tanzania mainland?

TANESCO owns most of the electricity Generating, Transmitting and Distributing facilities in Tanzania Mainland. The dataset provides information on existing, under construction and proposed power stations for hydro, thermal and substations, as well as existing and under construction transmission lines.

How is electricity used in Tanzania?

Electricity can be generated in two main ways: by harnessing the heat from burning fuels or nuclear reactions in the form of steam (thermal power) or by capturing the energy of natural forces such as the sun, wind or moving water.

How much power does Tanzania have?

Tanzania's total power installed capacity is 1,938.35 MW as of 31st December 2023. Of the grid installed capacity of 1,899.05 MW, 1,193.82 MW or 63% is produced with natural gas, 601.60 MW or 32% is hydropower, 83.93 MW or 4% is produced with fuel, and 10.5 MW or less than 1% is obtained with biomass.
