

Where to buy a 120-foot solar-powered container

Overview

What is a solar PV container?

The Solar PV Container is a containerized solar power solution. It has been designed with the aim of combining solar electricity production and mobility to provide this electricity everywhere around the world.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

How much solar area does a mobile solar container offer?

Up to 70 m² PV area. Our Mobile Solar Container is available in version 20'. It offers a vast solar area of up to 700m². One person in 15 minutes. It is really that fast to prepare the container. It is especially useful in bad weather when you can quickly fold the panels to prevent any potential damage.

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.
