Which energy storage company in Albania exports

Overview

Does Albania have a national strategy of energy?

Albania's Ministry of Energy recently launched an auction round for the construction of the country's first large-scale solar plant. The country also has a National Strategy of Energy, which aims to develop an effective energy sector that guarantees security.

Which sector consumes the most energy in Albania?

The largest energy consumer in Albania is the transport sector, whose share has almost quadrupled since 1990 and amounted to 40% of final energy consumption in 2018. The residential sector was the second largest (24%, 490 ktoe), followed by the industrial sector (20%, 418 ktoe) (EUROSTAT, 2019a) (INSTAT, 2020a).

Is Albania a net energy importer?

Albania is a net energy importer. Between 2014 and 2018, the amount of net energy imported ranged from a low of 12% of the TPES in 2015 to a high of 46% in 2017. Net energy imports are directly correlated to annual rainfall, given that the electricity sector is almost entirely reliant on hydropower production.

What type of energy is produced in Albania?

Energy production includes biomass (including wastes, residues, non-food cellulosic material, and lignocellulosic material), lignite and natural gas. Because domestic energy production is not able to meet demand, Albania is on average a net energy importer.
