What are the different types of uninterruptible power supplies?

Three main types of uninterruptible power supplies are currently used: offline, line interactive, and on-line systems. Offline UPS systems are standby systems that provide battery power to equipment when the main power supply falls underneath a certain limit. These are mostly used in home and office applications due to their lower cost.

What is an uninterruptible power supply?

Uninterruptible power supplies are used to protect computers, telecommunication equipment, and any other electrical equipment that could cause injuries, fatalities, or serious business disruption and data loss if unexpected power disruption occurs.

Why is the uninterruptible power supply market growing?

It must be noted that the growth of the uninterruptible power supply manufacturers' market can be attributed to the growing need for zero power downtime. In addition to this, the expanding need for scalable and redundant power systems has helped in achieving huge inflow of capital in the market.
