

Wind power storage in Sao Paulo Brazil

Overview

What is Brazil Windpower?

For 15 years, Brazil Windpower has been showcasing its great potential for networking and knowledge dissemination in the wind energy sector, bringing together key national and international representatives. The event promotes connections and business among hundreds of professionals during three days of immersion in the topic.

Is Brazil's wind power industry facing a crisis?

Brazil's wind power industry is facing one of the most severe crises in its history, according to the executive president of trade group Abeeólica, Elbia Gannoum.

What are Brazil's wind & solar curtailments?

Curtailments—restrictions on wind and solar power generation imposed by Brazil's National Electric System Operator (ONS)—have raised concerns among investors and increased perceived risk in the renewable energy market.

Why is Brazil deindustrializing its wind power supply chain?

The lack of new contracts is also driving a process of deindustrialization in Brazil's wind power supply chain, with equipment manufacturers announcing plans to scale back or halt production altogether. "Curtailments are sending a signal of declining investment in the renewable energy sector," Ms. Gannoum said.
