

# Zimbabwe's power demand-side energy storage policy

## Overview

---

Why does Zimbabwe need an energy policy?

Zimbabwe is party to a number of conventions and agreements at a global level. Globalisation, the new international environmental agenda and market reforms are some of the new developments of recent years. Therefore Zimbabwe needs an energy policy that learns from, and takes advantage of, these emerging international developments. 6.

What is Zimbabwe's primary issue in its energy sector?

Zimbabwe's primary issue in its energy sector's inadequate and aging infrastructure continues to be a challenge.

How can Zimbabwe achieve energy security and economic diversification?

The establishment of a stable and uniform policy framework, such as an integrated resource plan for Zimbabwe, to address the challenges of bureaucracy and disjointed efforts in RE integration. Zimbabwe could attain energy security, environmental sustainability, and economic diversification through the adoption of renewable energy technology.

How does energy demand affect economic growth in Zimbabwe?

These effects cause decreased economic growth and household incomes. With Zimbabwe's energy demand reaching about 2500 MW while the production capacity is still limited to less than 1500 MW, there is a need for more energy initiatives beyond the current enacted policies in the country to curb the problem of energy demand.
